FRAME WORKS AI

Ethernet Service-OAM

Solution Benefits

Solution Benefits

Detailed Performance Monitoring
Precision in monitoring Ethernet performance metrics.

Seamless Integration:
Easily integrated into your existing OSS, utilising our no-codeAPI.

Efficient Troubleshooting
Share real-time visibility of ONT and ENNI status, reducing time-to-diagnose with service delivery partners.

Network Optimisation
Monitor and optimise network performance for reliability.

Service Quality Assurance
Verify your delivery of high quality Ethernet services.

FrameWorks AI Solution Overview

Solution Description

FrameWorks AI specialise in advanced Ethernet Performance Monitoring (PM) solutions for Altnets and network providers, ensuring superior performance and service assurance for FTTH (Fiber to the Home) deployments.

Current Functionality

Y.1731 CCM
Monitor Ethernet ONT/ENNI availability with precision.

Y.1731 SLM/DMM
Ensure optimal network performance with robust Ethernet Performance Assurance.

Roadmap

Speedtest (iPerf/TR143/RFC2544/Y.1564)
Comprehensive speed testing capabilities available Q3 2024.
