Network Master Pro MT1040A Overview

Redefining Transport Testing

Key I&M Merits, Including Future Expandability and High Operation Efficiency

The Network Master Pro MT1040A for 400G networks is a handheld portable instrument for evaluating the communications quality of various networks operating at speeds between 10 Mbps and 400 Gbps.

400G Ethernet uses Forward Error Correction (FEC), which requires FEC evaluation. With a built-in FEC analysis function for 400G Ethernet, the MT1040A is ideal for quality evaluation of QSFP-DD and OSFP optical modules and devices, as well as for network performance evaluation.

- One unit supports all transport-network field tests
- Easy-to-use portable semi-B5 size case with easy-to-read 9-inch touch screen
- Measurement automation-support tools for efficient one-button execution of difficult tests
- For evaluating both 400 GbE dual-port and 100 GbE 4-port equipment*1
- Supports 400ZR+ and Open ZR+ (Also supports OpenROADM QSFP-DD)
- WLAN*2/Bluetooth®*3/LAN connectivity

*1: Requires MT1040A-020 and two MU104014B modules or two MU104011A modules.

*2: WLAN is available for certified countries and regions including USA, Japan and EU countries. Please visit the Anritsu web site for updated information.

*3: The Bluetooth® mark and logs are owned by Bluetooth SIG, Inc. and are used by Anritsu under license.
